

Celebrating Club Award Day in Grahamstown Clubs

On 18th and 19th September 2017, we celebrated Club Award Day for our 2 long-standing clubs. Pam Vale and Debbie Stott (from the SANC project) handed out award packs to celebrate the children's long-term commitment to the clubs and to their passion for mathematics. The packs, are full of fabulous mathematical goodies! Debbie started and facilitated both clubs and passed them over to Pam as the learners have progressed to more intermediate phase activities. Join us in celebrating with these dedicated and passionate young people!

The St Mary's Grade 5's have been in a club since Grade 3. Four of the original members still attend, whilst a number of new children have joined over the years.

Eight members of the Samuel Ntsiko Grade 7 club have been together as a group since 2015, with one new member joining. This will be the last year of the club for these children as they will be moving onto high school next year. Let's wish them all the best for their high school careers and beyond!

Samuel Ntsiko Grade 7 - Club Award Day - Celebrating almost 3 years of clubs together!
