

Pick up four

Two players – each have 4 beans/counters of different colours.

Each player places their 4 beans on any squares on the board. Take turns to place them on the board. You may not place them on the same square as another player.

Roll two dice – add them to get the answer. If the answer is a square on which you or your partner have a bean you can take that bean off the board.

The first person to remove all their beans from the board wins.
